### HYDRO-VAC Serving Municipal, Industrial and Energy Sectors

#### ■ SAFE

We can uncover buried lines and cables without fear of damage to services and the environment. Unlike techniques of traditional mechanical excavation the Hydro-Vacuum uses high pressure water and a large volume vacuum.

#### ■ VERSATILE

The Hydro-Vacuum can be extremely useful in hard to reach places such as along side of buildings & fence lines.

#### ■ FAST

Hydro-Vacuum loads and excavates simultaneously making our service fast and cost effective while remaining environmentally friendly.

#### ■ ACCESSIBLE

Our units, manufactured to handle the extreme Canadian conditions, are operational and available any day of the year.

#### ■ SOME OF THE MANY USES FOR HYDRO-VACUUM INCLUDE:

- Daylighting
- Line locating
- Environmental clean up
- Pile washing
- Catch basins
- Open excavation
- Cable locating
- Trenching
- Repairing water valves
- Manhole cleaning

Daylight and Hazardous Excavation  
Made Safe and Cost Effective
